

Operation Safe Corridor: Draft Concept of Operations December 2016

All entities who are not actual players in the exercise will be played by the Control Team.

Time	Activity
<i>Day prior to exercise</i>	
1700	OEMS will assign a mission to the HCC (day prior to exercise)
<i>Day of exercise</i>	
0900	HCC staff will activate and establish ICS
0930	HCC staff will advise coalition partners of situation via designated communications channels
0930	OEMS will send HCC patient data for relocation
1000	HCC will poll all coalition partners to determine bed availability
1100	HCC will compile bed availability and submit to OEMS
1200	HCC staff will attempt to place patients/residents with functional and full-scale coalition partners, determine the destination for each patient, & relay that information to OEMS
1400	Participating coalition partners at the full-scale level will receive actual patients & "admit" those patients
1400	Participating coalition partners at the functional level will receive information on simulated patients via WebEOC or email & "admit" those patients
1500	HCC staff will issue a situation update to all participating coalition partners and OEMS
1530	HCC will maintain communications with each coalition partner until verification is received that each patient has been admitted
1600	HCC staff will report back to OEMS upon admission of all patients
<i>End of exercise</i>	

Each communication must be recorded, either electronically (e.g. via WebEOC or email) or manually (via spreadsheet or other form) for evaluation.

Requests for resources by Coalition stakeholders will follow the process outlined in the NC Triangle Coalition Support Plan.
